Amount Requested: $400,000|
The project integrates sustainability across the curriculum, and enacts a national directive to improve STEM learning. The center will be flexible to quickly adapt to emerging and converging technologies, and responsive to the area workforce needs. Funds would provide laboratory equipment and furnishings for the Science, Engineering & Technology Center at Orange County Community College. This state of the art center will house Science, Technology, Engineering & Math (STEM) classes and encourage STEM careers.
