

Amount Requested: \$500,000

HealthAlliance is the largest employer in Ulster County and uses local vendors and contractors for all its grant projects. The consolidation of hospital infrastructure serves to develop and integrate health care facilities and services across the continuum of patient care, keeping existing health care jobs secure and creating new opportunities for employment and training. Funds will be used to consolidate and upgrade the patient medication safety system of the hospital campuses. Consolidation of the hospital's clinical programs serves the present and future health care needs of all people in the region, helping to keep down the burden of unmet health care costs in the community.
